

NetRex services up close

We pride ourselves on **quality hardware** and services that are practical and have **simple, user-friendly controls**.

How the NetRex solution works

High quality cameras

Choose top IP cameras from the leading Swedish manufacturer Axis Communications. We have been using them for all our solutions for more than 16 years and they are very reliable.

Cloud platform

You can easily connect the cameras and any other network elements to a cloud-based platform that offers complete remote management and many other features.

Wide range of services

A range of practical services are available on the platform: surveillance with recording, retail analytics, time-lapse video, streaming, reading vehicle registration plates and more.

What we provide for you:

The solution proposal

We will build a **solution that suits your needs** using the catalog of our services.

Installation and training

Our team will **install** everything for you and **explain** in detail how the system **works** and how to **operate it**.

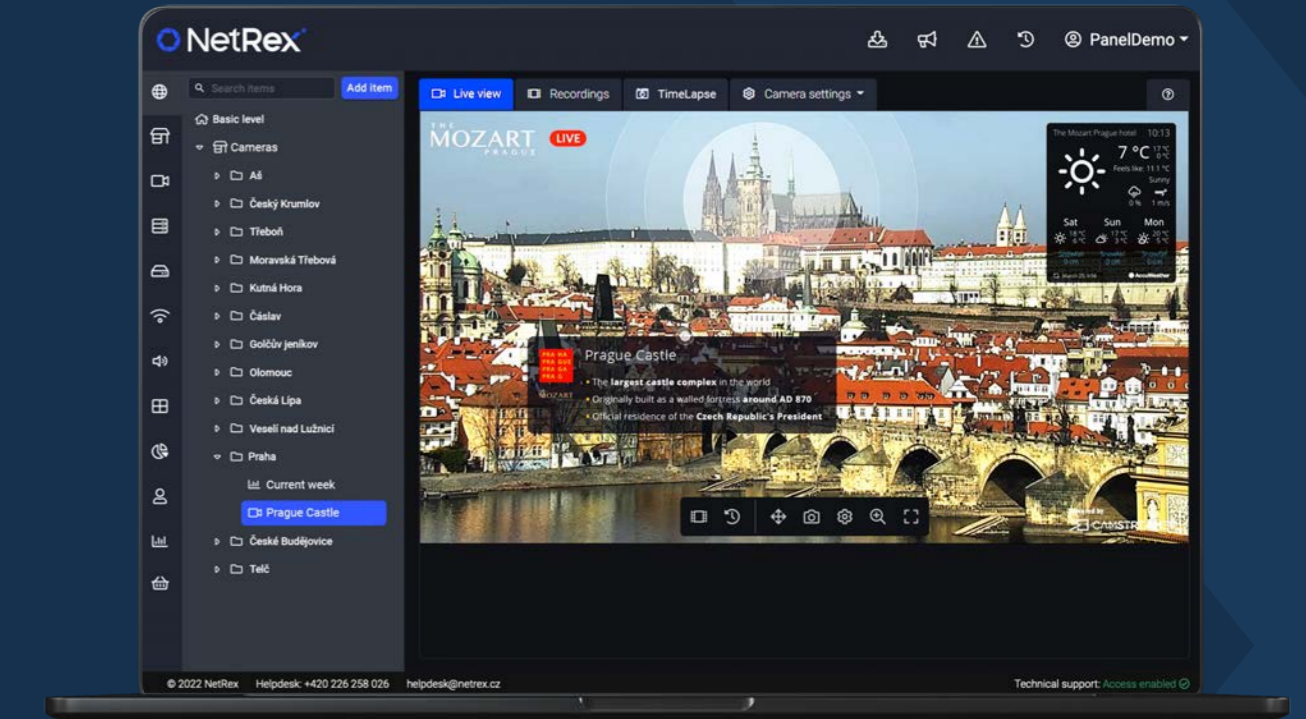

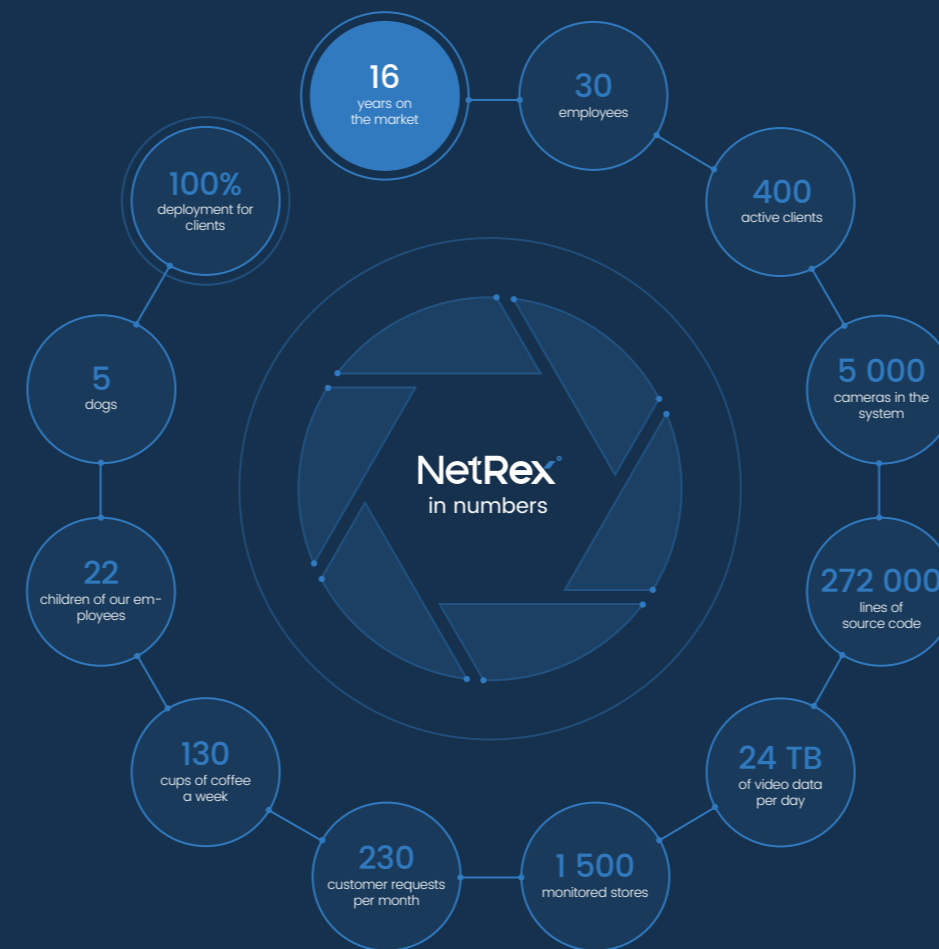

Support

Our **helpdesk** will help you at any time. In most cases, we can solve the problem remotely without a technician having to come out.

Who is NetRex?

We are a leading **IT company** offering **hosted video** services for **professional installations**. Since 2006, we have been continually exploring and discovering ways to **deploy modern network video technologies** with the ubiquitous internet. We strive to bring new ways to provide security, better control, and increase work efficiency.

We are a Czech company with a **presence and many installations in most European countries**. We have a **strong development team** and our close cooperation with the leading **IP camera** manufacturer, Swedish company **Axis Communications AB**, allows us to provide operational solutions to fulfill even the most demanding customer requirements. We believe that our services under the banner **"NetRex – Your Third Eye"** will appeal to you as well.

NetRex Streamer

A service that offers live video streaming directly from a camera to your web page. Broadcast live 24/7.

Just do it smart!

Certification & Membership:

Why NetRex Streamer and what live broadcasts allow you to do

01 You can broadcast current events directly to your webpage

- Video broadcast directly from an IP camera to a streaming platform (YouTube, Facebook, Vimeo, Twitch, etc.) or to your webpage.
- Detailed audience numbers and behavior stats.

02 Make your video visually appealing with graphic overlays

- Insert your own graphics directly onto the picture (logo, description, ticker, live results tables, or current weather information).
- Integration with third-party systems (insert data from specific products into your videos).

Take a look at interesting streams

Inspire with your selection of our realizations and do not hesitate to contact us! We will be happy to help you devise a solution directly for your needs.
